Marble, Granite and Green River Stone Monuments

A HOME INDUSTRY

Let us show you our monumental work, visit our plant and see the actual work that you want. All lettering and carving is done by skilled workmen of proven ability whose work cannot be surpassed in any city in the world. THEREFORE BUY AT HOME then you can see the work you are getting and know exactly what you have bought.

CLASS NO. THREE HAS CELEBRATION

Last Thursday evening the men of Class number three of the Marion Methodist Sunday School hied themselves from their places of business and from dull care and betook themselves to "Rochester Woodland" to pay their respect to an affair long looked for by class no. three. The occasion for this seeming negligence of the routine of business was the annual "Get-together" of the men of the Methodist Sunday School. Heretofore the eats of the affair have been in the form of a banquet but this year it was decided to have an old fashioned barbecue. And a bar-oil fashioned barbecue. And a bar-oil fashioned barbecue. And a bar-oil fashioned barbecue.

old fashioned barbecue. And a bar-becue it was with pork and mutton plenty and to spare with all the "fix-

life which has been called higher.

He professed faith in Christ at an early age and united with the Mt. Zion Methodist church of near Marion, there he lived a faithful and consistent member until death.

Mr. Nunn had been in fragile

health for many years but had on-ly been confined to his room and bed a few days before death, and although the last few weeks on earth were spent in a continuance of suffering never a complaint or murmur was heard escape the lips of the sufferer, he seemed to leave all with God and repeat "Thy will be done, not mine." Many times during his illness he expressed a willingness to die and re-joiced greatly in the hope of Christ. Mr. Nunn's greatest desire and ambition was to do something for the welfare of others and he was never happier than when making glad the hearts of those around him. He was strong worker in the church for Christ, and his religious influence will for ever dwell in the communi-

ties far and near and rejoice in the memory of of his life. All medical skill and loving hands assisted him, but all that could be done by the weak here on earth was of no use, when the Great Maker whispered "Come up higher" the spirit made its flight for the bright

WHY IS A DRUGSTORE?

Because life is too short and mankind is too modernized to go out out in the woods and gather roots and herbs for the cure of the multiplying ills of the day, as they did in ancient times.

It would take you hours, or days, or perhaps weeks to go to the woods and find what this drug store can sell you for a quarter or a half dollar. You can get many remedies here that you could never find in the woods, remedies that both cure and PREVENT sickness.

A Drug Store is the necessity of EVERY community. It is easier to keep well than it is to be cured after you get sick. We sell simple Preparations that KEEP YOU WELL

Alice, there ment of the United States is instructed is no reason why Mr. Singleton should to assume full responsibility for you until your father arrives."

"May I go on and clarify matters for Alice. She was established at ease in these gentlemen, for Mr. Torrence at a wicker rocker, unconcernedly plying least is entitled to a full explanation? "Constance," said Alice, turning with a little shrug to her friend, "we have been caught! Our story is being spoiled for us. Please go on, Mr. Raynor, Just what does the Amer-"Very well," muttered Torrence lean state department have to say about us?"

"That you are endowed with a very unusual personality," continued Raynor, his eyes twinkling. "You are not at all content to remain in that station of life to which you were born ; you like playing at being all sorts of other persons. Once, so your friend the ambassador confided to me, you ran away and followed a band of gypsies, which must have been when you were a very little girl."

"I was seven," said Alice, "and the gypsies were nice to me.

"And then you showed talent for the stage-"A dreadful revelation!" she ex-

claimed. "But you don't know that it was really your father who managed to have Mrs. Farnsworth, one of the most distinguished actresses in England,

"No! Alice never knew that!" said Mrs. Farnsworth, laughing. "I was her chaperon as well as her preceptress, but Alice's father knew that if Alice found it out it would spoil the adventure for her. Alice must do things her own way."

"You are a fraud" said Alice, "but

I always suspected you a little." "Speaking of the stage," resumed Raynor, "it is also a part of my instructions that the Honorable Miss Seabring shall be discouraged from any further adventure in that direction; she's far too talented; there's danger of her becoming a great lumorning," she said when we reached that papa should have thought of grace the boards again as Violet Dew-

ing." to me. "That was settled when you mailed that letter for me. It was year, a tonic is it," and she chose one and handed me laughed Raynor. "But the ambasso make an appointment with an Amergood, but take it the others; "if the flap side turns up. dor has warned us to be most tactful to an playwright who wants me to appear in a most adorable comedy." (TO BE CONTINUED.)

CLIMB THAT REQUIRED NERVE

English Workman Went 450 Feet In Air to Make Repairs to Marconi

Wireless Mast. The Morning Post of London gives the description of a climb performed by a workman in the employ of the Marconi company at their works in Chelmsford. A short time ago the highest part of a wireless mast 450 feet high, higher than the cross on the top of St. Paul's, was broken by a gale. How was it to be repaired? Ladders were out of the question. But the difficulties did not daunt one cf the workmen, who noticed that the mast was made of quarter-sections bolted together and then fitted one on top of the other. He asked, and was given permission, to try the climb. He made himself a belt, at the two ends of which were rings that would slip over the ends of the bolts. Thus equipped he started to mount on high. the bolts being his only means of support. On the first day he swarmed up 200 feet, fitted the tackle, and descended to earth, for it was too cold to proceed farther. On the second day he was holsted up the 200 feet, and rings and bolts, he got to the top of "Sir Arnold Seabring?" gasped Tor- the mast, where he effected the necessary repairs. The last 250 feet of climbing was done in an hour. The man's name was Post.

Trace Pedigree for Centuries. Speaking of old families and family trees, English and Americans who pride themselves on ancestry have reason to envy the Arabs, many of whom "I want you to stay," I said earnest a fraud, an impostor. You might go can trace their family line back fate in this-in everything that affects the wife of Sir Cecil Arrowsmith, authentic documents. Prof. Talcott But all the guilt is mine. ENNESSEE popularly known as The Volunteer state," says the encyclopedia. Just how, when or from whom Tennessee got the nickname pobody seems to know. Anyway, the man who hestowed it was a prophet. For Tennessee has just justified her nickname by doing something unique in the volunteering standard in the record of volunteer naval enlistment in time of peace. And the slocan that did it is:

"Go to sea on the Tennessee." When the superdreadnaught Tennessee steams away majestically from the New York navy yard some time in June she will be the first of Uncle Sam's first-class fighting ships to embody a certain new naval idea -the idea that it means pep, patriotism and corps spirit to man a battleship with men from the state whose name the battleship bears. There are 600 Tennesseeans on board-and more to come.

These 600 new payal recruits are the product of a whirlwind recruiting campaign through the state of Tennessee, says the Sun and New York Herald, which was led by Capt. R. H. Leigh, U. S. N., who is to command the new vessel, and who, as chief of staff to Admiral Sims during the war. operating in the war zone.

has the zealous co-operation of Gov. own ship."

GOOD HIGHWAYS ASSIST FARMER

Vast Road-Building Program Now Under Way Throughout Whole United States.

POOR ROADS ADD BIG TOLL

Projects Have Been Approved Calling for Federal Aid to Amount of \$110,840,773-Important Factor in Buying and Selling.

(Prepared by the United States Department of Agriculture.) The highway is coming into its own in America.

Neglected, abused, undervalued, subjected to cheap remedies for decades. at last the country road is being accorded the treatment it deserves. At a cost of hundreds of millions, the United States is rapidly overcoming the economic handleap which highway neglect has so long entailed.

This stupendous movement, the scope of which the public even now does

point on a moderately muddy earth road-and earth roads are moderately muddy many months in the year.

Several years ago information se cured by the department of agriculture from 2,800 correspondents indicated that the average cost of hauling on an unimproved country road was 22.7 cents a ton-mile. Today, with price levels much higher, the cost would be even greater. While it is difficult to estimate ac-

curately what the saving would be if all highways were improved in the districts represented by these replies, a specific instance makes the benefit plain. A farmer in a southern state had to haul a ton of barbed wire 23 miles, over unimproved roads, He found that with a two-horse team his maximum load was 500 pounds, and that three days were required to make one round trip. To haul one ton, therefore, required 12 days to make one round trip. Allowing \$6 a day for man and team, the cost was \$72. After the roads in this region were improved, the same team could draw a ton to the load and make one round trip in two days, at a cost of \$12. The ton-mile cost under old conditions was \$3.18. and this cost was reduced to 52 cents by the improved road.

Roads and Wheat Marketing.

Take the saving in the cost of hauling wheat as another example. If the not fully comprehend, is founded on construction of narrow, single-track sound business considerations. Good roads with improved surface will rerowls pay. If they did not, the nation | duce the hauling cost 5 per cent a tonwould not now be constructing and mile, and if the average yield of planning them on an unprecedented wheat in the vicinity of these roads is scale. They pay by promoting the so- 30 bushels to the acre, there results, cial life of the people, by helping re- for an average haul of five miles, an lieve the congestion that is making economic advantage of 22.5 cents an maelstroms of municipalities. But, acre or \$36 a quarter section. This is more important still, they pay in dol- 4 per cent on 8900. Unprecedented Road Program. This is a lesson cities as well as at the same time, effect a correspondrural districts are learning. In the bu- ing saving in each of the other crops. reau of public roads, United States department of agriculture, which administers the federal aid road act, is centered supervision of all highway construction which federal funds help carry on. At the close of last year, project statements had been approved calling for federal aid to the amount of On the prices at which he sells, all \$110,840,773-a sum which indicates other prices must depend. Good roads, better roads mean better business. The total federal funds available to aid the states in their road-building programs up to July 1, 1920, will be \$169,-750,000-and this total is exceeded by the combined expenditures of state,

county, and municipalities. Better Roads, Better Business.

The business considerations back of these vest investments are not far to seek. Better roads mean cheaper and quicker hauling. It has been estimated, for example, that on a level, muddy earth road the amount which one horse can draw in an ordinary wagon va-

Where Ton-Mile Costs Are Low.

ries from nothing to a maximum of 800 pounds; on a smooth, dry earth road, from 1,000 to 2,000 pounds; on a gravel road in bad condition, from 1.000 to 1.500 pounds; on a gravel read In good condition, about 3,300 pounds; on a macadam road, from 2,000 to 5,000 pounds; on a brick road, from 5,000 to 8,000 pounds.

If the speed of travel is the same on all of these surfaces, the horse will haul on a good macadam road from three to five times as many miles a day as upon a moderately muddy earth road. Assuming that one horse is capable of a certain fixed amount a day, then, with a given load, its effective radius of travel from that point on a macadam road is from three to five times the radius of travel from that

improved to effect a saving on wheat hauling equal to that cited above, and,

The lowering of distribution costs. It is now recognized, is one of the most important problems in reducing living costs. While business is searching for more economical methods of handling goods, the farmers have not been neglecting other phases of this problem. enabling him to get his products to the market at materially reduced cost. are among the big factors in more eco-

RURAL HAULING PROFITABLE

nomical distribution.

Many Farmers, Whose Trucks Are Not Filled to Capacity, Help Out Their Neighbors.

Many of the motortrucks on farms adjacent to large cities are not loaded to full capacity on their trips to the city. Few farmers have their business so a minged as to permit the use of the truck to its maximum capacity regularly. Many such farmers, according to the United States department of agriculture, have gradually begun to haul a part or all of their neighbors' products to market, and in some cases this practice has led to the establishment of a regular route. Some farmers have been enabled to purchase trucks, because their own business, coupled with that of their neighbors', has been sufficient to warrant such an investment.

If stable manure is reinforced with 50 pounds acid phosphate to the ton its crop producing value is just about doubled.

Paths and roads about the farmstead not only should be as few as possible but should be kept out of sight so far as feasible, say specialists of the Uni ted States department of agriculture. 1,000 miles of surfaced roads,

WAR MATERIAL DISTRIBUTED

Equipment Turned Over Promises to Be Great Aid in Carrying Out Road Building Plan.

To date the war department has turned over to the United States department of agriculture approximately 24,000 motor vehicles, as provided in congressional legislation empowering the latter department to distribute this war material among the state highway commissioners for use in road building, allotments of the vehicles to be based on the amount of federal aid for roads which the states receive. This is practically all the vehicles which the war department has to release. Of this total 12,000 have been delivered to the states. The remain der will be distributed as fast as rallway cars can be secured for their transportation. Representatives of the bureau of public roads, in charge of the matter, believe that within two or three months all of the vehicles will have been delivered to the states. This equipment promises to be a great ald in carrying the large road building program for 1920.

The state highway commissioners are also interested in securing allotments of tractors, steam shovels, locomotive cranes, antomotive cranes, industrial railway track, dump cars and industrial locomotives which remain to be disposed of by the war department. A measure known as the Kahn bill, directing the secretary of war to release this material for the state highway commissioners, has passed the senate and has been reported out of committee in the house,

Type of Motortruck Turned Over to States to Aid in Road Building.

Until the secretary of war has been directed by congress to turn out this diplomatic and ofisular appropriation any man from the Balkans who might equipment it is not likely that it will bill because of its provisions making be persecuted by his revolutionary govbe available for state distribution.

MAKING ROADS WITH BRAINS

Most of Heavy Work Incident to Highways Is Being Done by Machinery-Cost Is Less.

As help is scarce, and increasing traffic makes good roads a necessity, more and more of the heavy work incident to highways is being done by machinery.

At one time the work of leveling and road building had to be done largely with the pickax in the hands of workmen, and with shovels and teams. Now gasoline engines, motor trucks, and huge power-propelled cranes do all of the heavy work. In the pew method the expense is less than by the old method, for machinery is always cheaper than human labor, in that a mate

rial saving of time is effected. Good roads are an economy to any section of the country, as they permit produce to be hauled to market just when it will bring the most, and property is always worth more which borders well-constructed highways. Try to buy a farm along a concrete road and you will find the location makes a big difference in the price asked.

REDUCE COST OF MARKETING

It Can Be Brought About by Farmers Using More Trucks, Trailers and Automobiles.

The high cost of markett g that is such a factor in the cost of riving will be reduced when the roads are improved and farmers use more trucks, trailers and automobiles in reaching city markets with their products.

UNPAVED ROADS UNCERTAIN

When Weather is Good They May Be Passable If They Have Been Continuously Dragged.

Unpayed roads vary with the weath er-payed roads are constant. When the weather is good, dirt roads may be passable if they have been continuous ly dragged, but they are not roads for truck and automobile traffic, so characteristic of the highways today when properly constructed.

Good Roads Are Needed. The need of good roads has been impressed on the entire country in such a manner that first cost has become a secondary consideration.

Mississippi Valley Roads. Of the 2,250,000 miles of rural highway in the Mississippi valley only a scant 100,000, or 7.8 per cent of the total, are hard surfaced.

Surfaced Roads In Florida. Florida now possesses more than

STOCK THRIVE ON ROUGHAGE

Feeding Value of Silage, Fodder and Stover in Dairy Ration Not Fully Appreciated.

The feeding value of corn silage, corn fodder and corn stover in the dairy ration is not sufficiently appreclated, especially in those regions where legumes do not thrive, says a specialist of the dairy division, United States department of agriculture. A recent study of records from cowtesting associations points to the conclusion that the growing of more corn roughage and less non-leguminous hay would increase the profitableness of the ration.

In all sections where legumes thrive it is, of course, advisable to grow them, as their value is well recognized for feeding dairy cattle. In fact, from a study of cow-testing association reports it would seem that even grain does not fully take the place of good legume roughage. It is in these sections where legumes do not thrive, however, that dairymen may well consider the growing of more corn roughage and less non-legume hay.

Few plants apparently contain all the substances required to nourish properly the animal body, but in the light of present knowledge, the corn plant seems to be one of these. It is possible to balance a ration from orn products only that will enable the animals to thrive and reproduce with apparently no ill effects.

Filling Silo With Corn-More Corn Silage or Other Corn Roughage Is Needed, Especially in Regions Where Legumes Do Not Thrive.

not the case with many other crops. Corn, then, has unusual feeding prop-

erties. Experimental work done at the South Carolina and Pennsylvania stations has shown that it is practical under some conditions to feed dairy cows on a ration of corn silage and grain without hay. Such a ration has been used successfully in feeding beef steers. Reports from one cow-testing association in a non-leguminous hay region having an unusually high income over cost of feed and large production per cow is in a district where the dairymen have practically discontinued the feeding of hav, but instead feed silage and corn fodder. In this association the grain ration is also

composed largely of corn by-products. No matter what other conclusions may be drawn from the evidence available showing the value of corn fodder and corn sllage as dairy feeds, it seems certain that the corn plant provides an excellent roughage.

Hay is often damaged very much by becoming overripe. Storms damage it seriously. The feeding value of corn is not damaged by its becoming mature, and if it is properly shocked storms do little damage to it.

There are undoubtedly many dairymen who can well consider the wisdom of reducing the amount of nonleguminous feed, corn fodder, and silage to feed their dairy cows.

DAIRY NOTES

Feed the cows well.

The sooner the utensils that have contained milk or been in contact with It are washed the easier the job will

That Black-Draught Is Excellent for Stomach and Liver Disorders, Hence Its Great Popularity.-Mississippi Planter's Indorsement.

Houston, Miss .- Mr. J. A. Trenor, a well-known planter of this place, recently related his experience in using Thedford's Black-Draught. I don't believe there is a better liver medicine made." said Mr. Trenor. "I use it for headache, stomach disorders and torpid liver.

"It is not bad to take, does not leave a constipated condition, as so many of the liver pills and medicines do. It does its work and leaves you feeling like a new person."

Thousands of others have found Black-Draught as helpful as Mr. Trenor describes, and a valuable remedy for derangements of the liver, stomach and bowels. It is purely vegetable, having an active effect upon the bowels, gently stimulating the liver, and helping to increase the flow of bile.

Black-Draught has been found to assist in the digestion of food, and relieves constipation in a prompt and normal way.

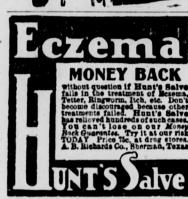

On account of Black-Draught's longproved merit and immense popularity, many imitations are being offered for sale. For your own satisfaction it will pay you to insist upon the genuine, and be sure the package bears the name "Thedford's Black-Draught."

At your druggist's-ready for instant use-full directions in package.

us, and it is nice to think of helping people to sleep, for we're gentle, kind souls, and it is nice to help.

"So, Laura Lamb, you, too, always follow the leader. Don't go through one gate yourself and have your cous-Ins going through another and some other cousins through the opening in the fence and the others perhaps going under the fence.

"We must all go together, we sheep," And Laura Lamb bleated and said: "Ba-aaa-baa-aaa, Mother Sheep! I will do as you say. For I would not feel claim: are still coming in. So far brave enough to do any other way, I would not want to be a leader, and I am glad to have a leader. I wouldn't want to go off on my own account. I would want to keep around with the others. I would be afraid to go burryjusted through the advice of the tech- ing across the road the way I've seen

"No. I care more to do as the other per cent of the manufacturing re- vicinity of Hutchinson, Kan., Three 000,000 worth of claims went through sheep do, to enjoy the lovely summer carloads of ammunition arrived there without change, although a satisfactime, to bleat and to bas and to talk upon the people who look at me.

"I don't care to shriek at them and talk to them as the turkeys will so often do, but I like to look at them when they are nice and quiet and when they smile at me.

"That's what I live to do when people smile at me," said Laura Lamb, "Yes," said Mother Sheep, "and remember too that the children of the farmer who owns this farm and all of the animals upon ft, are very kind to us. They come and pet us and we need not be afraid of them. We can be very tame and you will become tame as I am tame with them.

"They come and pet us and kiss our heads and ears and we must bleat and bas and tell them we love them, too, to be gentle with us, for they know that is what we like so much.

"But always remember above all things, Laura Lamb, "that we must follow the leader, especially when the leader has us follow him through a gate, for we must remember what a help that is to people when they can't sleep. They can think of us. and if they thought of us all going in different directions it would be so confusing they couldn't sleep, as I told you be fore

"Remember that, dear Laura Lamb, Ah, my lovely lamb child, how I love "Bleat, bleat, b-l-e-g-t," said Laura

Lamb. "I will do as you say about the following of our leader. Ah, there come some of the farmer's children." "Yes, there they come, they love the sheep and the lambs," said Mother

And as they came near they walked quietly and talked to the sheep and the lambs in soft, gentle voices, and the lambs and the sheep followed them about and said: "Baa-baa, b-l-e-a-t, we so love you, for you are so good and kind to us, and our little lamb hearts and our big sheep hearts are very grateful."

And their eyes, too, told how much they loved the children, who never frightened them, but who loved them, and who understood their gentle ways.

CALOMEL USERS

t's Mercury! Attacks the Bones, Salivates and Makes You Sick.

There's no reason why a person should take sickening, salivating calomel when a few cents buys a large bottle of Dodson's Liver Tone-a perfect substitute for calomel.

It is a pleasant, vegetable liquid which will start your liver just as surely as calomel, but it doesn't make you sick and can not sallvate. Children and grown folks can take

Dodson's Liver Tone, because it is perfectly harmless.

Calomel is a dangerous drug. It is mercury and attacks your bones. Take a dose of nasty calomel today and you will feel weak, sick and nauseated tomorrow. Don't lose a day's work. Take a spoonful of Dodson's Liver Tone instead and you will wake up feeling great. No more biliousness, constipation, sluggishness, headache, coated tongue or sour stomach. Your druggist says if you don't find Dodson's Liver Tone acts better than horrible calomel your money is waiting for you.

Nothing makes a man so sore as having to pay his wife's board when she visits her friends.

Lift off Corns!

Doesn't hurt a bit and Freezone costs only a few cents.

With your fingers! You can lift off any hard corn, soft corn, or corn be tween the toes, and the hard skin calluses from bottom of feet.

A tiny bottle of "Freezone" costs little at any drug store; apply a few drops upon the corn or callous. Instantly it stops hurting, then shortly you lift that bothersome corn or callous right off, root and all, without one bit of pain or soreness. Truly! No humbug !-- Adv.

Midsummer Brings Its Blouses

N EPILOGUE to the story of sum- | model its tailored character. Wide A MEPILOGUE to the story of sumsleeve persists, except for the tallored bon girdle. styles. Tricolette was a second thought with designers and has proved immerisely popular. Just now it has lo Aed forces with georgette and these two are used together, with the tricoteste appearing in wide panels on the front of sheer blouses to provide a smart vest for the street or formal suit.

Nearly all the new smocks are very short, made of georgette with embroidery for decoration. Those for afternoon and dinner wear are in high colors and often use a plain and a figured pattern in combination. Orange. flame, turquoise, emerald, rose and jade green are in high favor and they are embroidered in other brilliant colors. Georgette maintains its position as the favorite material for blouses, but rival it as summer advances. These POISON BAIT FOR CUTWORMS lovely and practical volles are reasonably priced and other blouses show a decline that is promising. Voile is ideal for wear with street suits and wash satins or pongee silks are its competitors in tailored models

A blouse and a smock of georgette are shown in the picture, both of them examples of long-sleeved designs. The blouse is in a very light tap color, and cherries with twigs and foliage are embroidered in beads and silk. Very slim woman or the debutante, and wide tucks at each side of the front when made of voile or taffeta fall in and above the cuffs help give this soft, graceful lines.

longer than the story itself for mid- models employ very narrow ones and summer has modified the earlier styles pin tucks like those that embellish the and added some new ideas to those smock pictured. An attractive detail that the spring has brought in, in this smock appears in velvet ribbon The popularity of elbow and shorter bands at the waist, and a velvet rib- result.

ulia Bottomle,

Among the smart tailored frocks recently brought out for little girls, one

especially good-looking dress was of tan linen with a cuff hem of dark brown. With this dress a brown straw hat, or a tan-colored one with brown hand, and brown shoes and stockings and hair ribbons should be worn. A little blue-and-white striped organdie frock recently seen had stripes of the waist running vertically and of the skirt horizontally. Color combinations fine voile is very close to it-may out- are approved, a yellow linea frock having cuffs and collar of lavender linen.

Gingham Trims Tricotine. This is to be a season of bright con-

trasts, so behold even tricotine frocks trimmed with a collar and vest of French gingham, the edge of the latter frilled well down toward the hem of the skirt.

EVIDENTLY HE WASN'T READY

Colored Driver Didn't Wait to See Who It Was That Had a Desire for Him.

While visiting in Nashville, Tenn. my ventriloquist son and I hired a car and driver for a sightseeing tour, writes a correspondent. In leaving the city we passed a private cemetery where the gravestones were close to the road, and I noticed that our driver put on speed and rolled his eyes toward the spooky-looking plot.

I was startled myself to hear an unearthly gross come beneath the nearest stone, but turned in time to watch my son grinning before the colored driver put on a burst of speed that nearly threw us out Then came another groan that seemed to come from the sent next the driver and a deep voice that said: "Boy, I want you."

That was just before we went over ning in the road. It was an hour after he disappeared in the distance before we caught a ride back to the city.

WILSON HILL FARM TUESDAY, JUNE 29th,

Mr. S. M. Jenkins, having decided to retire from active business life, has contracted with us to sell his Wilson Hill Farm, together with all his other holdings in and around Marion, at absolute auction, without any reserve whatsoever, on Tuesday, June 29th. Besides the Wilson Farm, we will sell the Electric Light and Water Plant, the magnificent residence in which he lives, the Park-Wilsonia Apartments, and a few extra choice residence sites facing on Main, Depot and College St.

Also the following chattels; 10 head milch cows and heifers, 2 brood mares, one with mule colt at side, 1 pr. 2 year old mules, 1 wagon, 1 buggy, 1 mower, 1 wheat drill, plow harness and miscellaneous farming machinery.

OF GREAT IMPORTANCE TO YOU. This is a genuine sale. We have no other kind. We sell no properties privately, but do an exclusive auction business. No set price, no reserve, no puffing or by-bidding. YOU MAKE THE PRICE--WE MAKE THE DEED--that's all.

Fifty Dollars in Gold

Fifty dollars in gold and other attractive and valuable prizes will be given away during the sale. Tickets will be distributed to each and every white person on the ground, whether purchaser or not, entitling the holder to an equal chance on all free prizes. Drawing one prize will not bar you from an equal chance on others. The only condition required is you must be there.

Fifty Dollars in Gold

This well known farm joins the town of Marion and extends along the main road to Fredonia. It will be sub-divided into tracts of one acre up.

The improvements consist of a comfortable house of medium sizs, with stock barn, stable large silo, sheds etc.; there are some 30 acres in cultication, good cistern at house and fine well at barn. Various varieties of fruit, plenty of fire wood, a locust grove that will furnish fence posts for many years and a walnut grove that is today worth considerable money for veneering, and is growing more valuable are on the place.

The small tracts are desirably located; most of them face on the Fredonia road. They should be especially attractive to the retiring farmer or business man desiring more ground than a mere building lot.

Buy them now both for their value as home sites and for the speculative rise which is bound to come.

With the constant increase in farm lands all over the country valu are so high that the average man is fearful of his ability to ever own a piece of land. However, here is your opportunity to purchase just what you want AT YOUR OWN PRICE. If you make no bid, there will be no chance for you to buy; but the other fellow who bids will certainly have a deed to a tact of land that he has secured at a bargain.

Make up your mind now to attend the sale. . Go out and inspect the property, pick out your location, and Tuesday June 29, buy it at your price.

A man may buy or build a house but it takes a woman to make a home. We extend a cordial invitation to the ladies to attend the sale. These beautiful residences that will be sold at the bidders' price should interest them.

There will be a band concert during the sale. The music and the presence of Col. H. L. Iglehart, an auctioneer of national reputation will make an enjoyable day for all.
